

## Vocus Elf CI-TOF

The most compact and economic solution for real-time trace VOC monitoring and screening

### Features

- Revolutionary Reaction Cell Design that brings exceptional sensitivity and speed.
- Low detection limit 50 ppt in 1 min.
- Field-Ready Hardware. Compact, durable architecture brings laboratory-grade performance to challenging environments.
- Small footprint with 380 x 500 x 650 mm and < 450 W power consumption.

### Applications

- Air toxic monitoring
- Mobile monitoring for source emissions
- Industrial park air monitoring
- Fenceline monitoring
- Fast screening of material emissions
- QA/QC on production line
